Table in HTML

⇨ We Can Insert Table in HTML By Using <table> tag

   <table> is Container Tag , So It Must Close With </table>

⇨ Each table row is defined with a <tr> tag (Table Row) . Each table header is defined with a <th> tag (Table Heading). Each table data/cell is defined with a <td> tag (Table Data)

⇨ Attributes :

   border : We can specify border in table

   bordercolor : We can set border color in table

   bgcolor : We can set background color in table

   background : We can set background image in table

   height & width : We can set a table width and height using width and height attributes

   colspan & rowspan : We can use colspan attribute to merge two or more columns into a single column. Similar way we can use rowspan to merge two or more rows
